Many children with asthma look normal, healthy, and are active

Did you know...

- 1 in 7 children in Hawai‘i have asthma
- There are 4 children with asthma in every elementary and intermediate classroom in Hawai‘i
- 3 out of 5 children hospitalized for asthma are under 5 years old
- In Hawai‘i, approximately 31,600 children 0 – 14 years have asthma
- Asthma is one of the most common reasons for school absences
- Children with allergy problems like hay fever and eczema are more likely to have asthma

Common Symptoms of Asthma

Does your child have any of the following symptoms without fever?

- Cough that gets worse, or only happens, at night
- Cough that gets worse with exercise
- Cough that doesn’t go away
- Shortness of breath
- Tightness in chest
- Wheezing

If you checked yes to any of the above symptoms, your child may have asthma. See your child’s doctor. Work with your doctor to find an appropriate treatment. To get a referral to a doctor or a community health center near you, call:

Your child does not have to live with these symptoms.

If your child has a hard time breathing when around cockroaches, dust mites, pets, smoke, or mold, here are some things you can do:

**Smoking**
- Do not allow smoking in your home or around your child
- Be sure no one smokes at your child’s day care center, babysitter, or school

**Dust Mites**
- Cover your child’s mattress, box spring, and pillow in special “dust mite-proof cases”
- Wash your child’s sheets and blankets every week and air dry in the hot sun or use a dryer

**Cockroaches**
(Many people with asthma are allergic to dead roaches and cockroach doo-doo or droppings)
- Get rid of roaches from your home by using traps
- Keep pets out of rooms that have cloth-covered furniture and carpets

**Mold**
- Fix leaky faucets, pipes, or other sources of water
- Clean drains and air conditioning filters regularly
- Clean moldy surfaces with a cleaner that has bleach in it
- Remove damp and moldy carpets
- Do not use old wool blankets

**Pets**
- Remove pets from home
- Keep pets out of your child’s bedroom and keep the bedroom door closed
- Keep pets out of rooms that have cloth-covered furniture and carpets

**Strong Odors**
- Avoid using strong smelling cleaning products, perfume, and after-shave lotion

*Asthma cannot be cured, but it can be controlled.*
